

REMARKS

Applicant has rewritten claims 1-5 to overcome the Examiner's objections. To be more specific, the terminology "said measuring kit and said holding member get a predetermined length and are perpendicular to a working service" has been rewritten to state that "said measuring kit and said holding member have a predetermined length and are perpendicular to a working surface". Further, the language in line 9 has been rewritten by deleting "be received in" and replaced by "attach to". It is respectfully submitted that this language is clear and fully supported by the specification. Accordingly, no new matter has been entered.

In claim 2, lines 1-4, the language "to be said holding member" has been deleted and believed to make the claim definite and understandable.

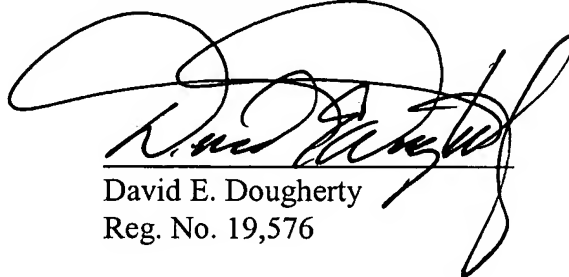

Applicant has also amended claim 3 for grammatical purposes. For example, "it has" in line 4 has been replaced with "having". Also, in claim 4, line 2, "is" has been replaced by "are" for grammatical correctness.

Finally, in claim 5, line 2, the word "tailing" has been replaced with "bottom"; and in lines 3 and 4, "is suitably and flexibly" has been deleted and replaced with "may be".

It is respectfully submitted that the aforementioned changes now place this application in condition for allowance.

A prompt and favorable action is requested.

Respectfully submitted,

David E. Dougherty
